

REGULATORY GUIDE

NEBRASKA DEPARTMENT OF HEALTH AND HUMAN SERVICES REGULATION AND LICENSURE

REGULATORY GUIDE 2.0

RECIPROCITY REQUIREMENTS FOR OUT-OF-STATE RADIATION GENERATING EQUIPMENT

The purpose of this regulatory guide is to provide out-of-state radiation generating equipment registrants the requirements necessary to obtain reciprocity in the State of Nebraska as per Title 180, Nebraska Regulations for Control of Radiation, 180 NAC 2-012 "Out-of-State Radiation Generating Equipment." Upon receipt of the required information and annual fee for reciprocity the determination of reciprocity shall be made. Reciprocity registrants shall be billed every year in the month in which the original reciprocity was granted.

- A. Whenever any radiation generating equipment which is registered in another state or by the federal government is to be brought into the State, for any temporary use, the person proposing to bring such equipment into the State shall give written notice to the Agency (at least 2 working days) before such equipment is to be used in the State. The notice shall include:
 - 1. The type of radiation generating equipment;
 - 2. The nature, duration, and scope of use; and
 - 3. The exact location(s) where the radiation generating equipment is to be used; and
 - 4. The date of transfer of each radiation generating equipment.
- B. If, for a specific case, the (two working-day) period would impose an undue hardship on the person, upon application the Agency, permission to proceed sooner may be granted.
- C. The person referred to in (A) above shall:
 - 1. Comply with all applicable regulations of the Agency;
 - 2. Supply the Agency with such other information as the Agency may reasonably request; and
 - 3. Not operate within the State on a temporary basis of 180 calendar days per year.
 - 4. Submit the appropriate fee as specified in 180 NAC 18. This fee will be determined by the Agency and billed to the registrant prior to authorizing reciprocity.

NEBRASKA DEPARTMENT OF HEALTH & HUMAN SERVICES REGULATION AND LICENSURE, REGULATORY GUIDES

Regulatory Guides are issued to describe and make available to the public acceptable methods of implementing specific parts of Title 180 Nebraska regulations, "Control of Radiation", to delineate techniques used by the staff in evaluating specific problems or postulated accidents, or to provide guidance to applicants, licensees, or registrants. Regulatory Guides are not substitutes for regulations, and compliance with them is not required. Methods and solutions different from those set out in the guides will be acceptable if they provide a basis for the Nebraska Department of Health and Human Services Regulation and Licensure Department, Public Health Assurance Division, Radioactive Materials Program, to make necessary determination to issue or continue a license or certificate of registration.

Comments and suggestions for improvements in these Regulatory Guides are encouraged at all times and they will be revised, as appropriate, to accommodate comments and to reflect new information or experience. Comments should be sent to the Nebraska Department of Health and Human Services, Regulation and Licensure, Public Health Assurance Division, Radioactive Materials Program, 301 Centennial Mall South, P.O. Box 95007, Lincoln, NE 68509.

Requests for single copies of issued guides (which may be reproduced) should be made in writing to the Nebraska Department of Health and Human Services, Regulation and Licensure Department, Public Health Assurance Division, Radioactive Materials Program, 301 Centennial Mall South, P.O. Box 95007, Lincoln, NE 68509.
